COMPARABLE COMMENTS AND FINAL RECONCILIATION

SALES COMMENTARY

Due to a lack of recent and similar comparables, it was deemed necessary to utilize comparables with a date of sale time over 120 days. Market conditions data from QVM and supplemental sources are conflicting. Review of sales data and supplemental sources indicate time adjustments for the presented comparable sales are not warranted. Sale #2 adjusted for its inferior location. Sale #2 adjusted for condition based on listing photos and/or listing remarks.

LISTINGS COMMENTARY

Due to an extreme lack of recent and similar listings in subject's area, no comparable listings were found and deemed reasonable for comparison.

ADDITIONAL NOTES

1. Outbuildings have only been reported as an amenity and in the grid if appear to be located on permanent foundation. If foundation unknown, no amenity rating or value given as considered personal property. No value given to above ground pools and spas as considered personal property.
2. Due to a lack of similar and more proximate comparables, it was deemed necessary to expand search parameters across major roadways and highways.
3. Full market trends and data are not available for the assignment. Supplemental data sources have been utilized as basis of analysis.
4. Due to a lack of recent and similar comparables, it was deemed necessary to exceed the net adjustment guideline of 15% and the gross adjustment guideline of 25%.
5. Subject and Sales #1 and #3 appear proximate to railroad tracks but are sufficiently distant as to not be significantly impacted by generated noise and no location rating deemed necessary.
6. Inspection report notes the subject is proximate to an antenna; however, this appears to be typical for the area and no location rating deemed necessary.

EVALUATION LIMITING CONDITIONS AND CERTIFICATIONS

REPORTING OPTION AND PURPOSE OF EVALUATION: This is an Evaluation as defined by the Interagency Appraisal and Evaluation Guidelines. The purpose of this Evaluation is to develop an opinion of market value (as defined) for the identified subject property.

INTENDED USE: The intended use of this Evaluation report is to assist the client in evaluating the suitability of the subject property as collateral for a lending transaction. This report is not intended for any other use.

INTENDED USER: The only intended user of this Evaluation report is the client identified on the first page of the report. Use of this report by any others is not intended. If you are not identified as the client, you are an unauthorized party and are warned not to use this report. As an unauthorized party, your interpretation of the information contained in this report may be incorrect.

DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

- (1) Buyer and seller are typically motivated;
- (2) Both parties are well-informed or well advised, and acting in what they consider their own best interests;
- (3) A reasonable time is allowed for exposure in the open market;
- (4) Payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and
- (5) The price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale. (Source: Office of the Comptroller of the Currency, under 12CFR, Part 34, Subpart C)

REAL PROPERTY INTEREST: The real property interest is Fee Simple interest, unless otherwise indicated in this report.

SCOPE OF WORK: The scope of this assignment includes analysis of the subject data and comparable data, as well as, other relevant information by the evaluator. If an inspection is included within this report, the subject data is provided by a qualified third party and assumed to be accurate. The evaluator has reviewed and validated the inspection data. The evaluator also relies on varied sources of additional data about the subject property and comparables from public record data services, multiple listing services, automated valuation models and/or other data sources considered relevant to the opinion of value.

Comparables or comparable data includes, but is not limited to, closed sales, available listings, pending sales, or any other transaction(s) that the evaluator determines to be comparable applying the criteria that would be used by a perspective buyer for the subject property. The confirmation of closed sales is from public data sources, unless otherwise noted in the report. Any photographs of comparables used in the report are taken from Multiple Listing Service (MLS) or other online sources, unless otherwise noted in the report.

The type and extent of analyses applied to arrive at opinions or conclusions in the sales comparison approach is based on qualitative analysis. This method of analysis accounts for differences between comparables but without quantified, numerical adjustments. Common qualitative techniques include ranking and relative comparison analyses. In ranking analysis, the comparables are ranked to determine each of their positions relative to the subject property's relevant characteristics. Relative comparison analysis is used to determine if the relative characteristics of a comparable are inferior, superior or similar to those of the subject property. Quantitative analysis may also be employed, and adjustments made reflective of market preferences.

Certain automated adjustments are generated based on an application of Quantarium's AVM (QVM) technologies. Such adjustments leverage machine learning valuation adjustments derived from a broad analysis of location relevant larger data sets, including among other, statistically reliable common factors of gl_a, lot size, age and other property characteristics. Some or all of those adjustments MAY have been overridden by the evaluator based on local market expertise.

INTENDED USER (CLIENT) SCOPE OF WORK AGREEMENT: All data is collected, confirmed and analyzed in accordance with the scope of work; determined appropriate by the evaluator given the intended use. The client agrees, by use of this evaluation report, such limitations of the assignment will not affect the credibility of the opinions and conclusions given the intended use; and, is consistent with the client's level of risk tolerance. **WARNING:** From the perspective of the client, this scope of work may result in an opinion of value that is not as reliable in comparison to a full appraisal that includes a personal viewing of the interior and exterior of the subject property, overall neighborhood or market area and comparables used and, if employed, providing a qualitative analysis in the sales comparison approach.

SUBJECT PROPERTY EXISTING USE AND HIGHEST AND BEST USE: Given the zoning and other relevant legal and physical characteristics, the highest and best use continues to be its present use, unless otherwise indicated in the report.

APPROACHES TO VALUE: The sales comparison approach is used exclusively, unless otherwise indicated in the report.

STATEMENT OF ASSUMPTIONS AND LIMITING CONDITIONS: The evaluator's certification in this report is subject to the following assumptions and limiting conditions and to such other specific and limiting conditions as are set forth by the evaluator in the report.

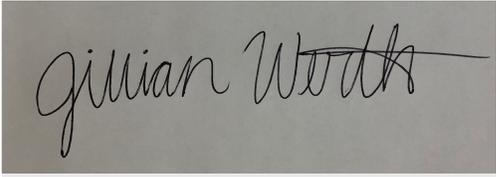

WARNING: The use of assumptions may affect assignment results.

1. The evaluator will not be responsible for matters of a legal nature that affect either the property being evaluated or the title to it. The evaluator assumes that the title is good and marketable, and will not render any opinions about the title.
2. The evaluator will not give testimony or appear in court because he or she made an evaluation of the property in question, unless specific arrangements to do so have been made beforehand, or as otherwise required by law.

The evaluator will not be responsible for any such conditions or influences that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the evaluator is not an expert in the field of environmental hazards, this evaluation report must not be considered as an environmental assessment of the property.
4. The evaluator obtained the information, estimates, and opinions that were expressed in the evaluation report from sources he or she considers to be reliable and believes them to be true and correct. However, the evaluator does not assume responsibility for the accuracy of such items furnished by other parties.
5. The evaluator has based the valuation conclusion on the identified and available data sources, which are considered reliable and include, but are not limited to, public records, and MLS data.
6. The evaluator assumes the subject property complies with zoning, environmental and land use regulations, and that the present use is the Highest and Best Use as improved.
7. The evaluator will not disclose the contents of this report except as required by applicable law.
8. When an interior viewing of the subject is not performed as part of an assignment, the interior of the subject is assumed to be consistent with the condition of the exterior of the property, and that interior appointments and amenities are consistent with similar properties located within the area.
9. Factors such as easements, restrictions, encumbrances, leases, reservations, covenants, contracts, declarations, special assessments, ordinances, or other items of a similar nature that would significantly affect the evaluator's opinion of value are not apparent.
10. Components, such as mechanical, electrical, plumbing that constitute the subject property are fundamentally sound and in good working order.

- 6) my compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this evaluation.
- 7) I have **not** made a personal inspection (viewing) of the property that is the subject of this report.
- 8) I have personally prepared all opinions and conclusions concerning the subject property that were set forth in the evaluation report.
