20 West Grover St.
Flanders, N.J. 07836

You are hereby notified that the following violation exists on your property located at:

20 West Grover St. Block: 5702 Lot: 2

In violation of: Mount Olive Code 445-6, 445-111

DESCRIPTION OF VIOLATION:

1. **Failure to renew the License to Operate for the sewage disposal system located at above referenced property. The completed application and the \$15.00 (fifteen dollar) license fee have not been received by our Department.**

ORDER TO ABATE:

This condition shall be abated, corrected or removed on or before: **December 19, 2020**
Failure to comply with this order shall cause appropriate legal action to be taken by the Mt. Olive Township Board of Health.

PENALTY:

If convicted of the above referenced violation, the penalty, as prescribed by law shall be:
not more than \$1,000 (one thousand dollars)

If you have any questions, please feel free to call the health department at (973) 691-0900 Ext: 7354.

Sincerely,

Robert Stahlhut, Chief Registered Environmental Health Specialist

REQUIRED INSPECTIONS

Construction work must be inspected in accordance with the State Uniform Construction Code Regulations N.J.A.C. 5:23-2.18. This agency will carry out such periodic inspections during the progress of work as are necessary to insure that the work installed conforms with the requirements of the Uniform Construction Code.

The owner or other responsible person in charge of work must notify this agency when work is ready for any required inspections specified below. Requests for inspections must be made at least 24 hours prior to the time the inspection is desired. Inspections will be performed within three business days of the time for which they are requested. The work must not proceed in a manner which will preclude the inspection until it has been made and approval granted.

- Required inspections for all subcodes for one- and two-family dwellings are as follows:
 - The bottom of footing trenches before placement of footings, except that in cases of pile foundations, inspections shall be made in accordance with the requirements of the building subcode.
 - Foundations and all walls up to grade level prior to back filling.
 - All structural framing, connections, wall and roof sheathing and insulation; electrical rough wiring, panel and service installation; rough plumbing. The framing inspection shall take place after the rough electrical and plumbing inspections and after the installation of the heating, ventilation and /or air conditioning duct system. The insulation inspection shall be performed after all other subcode rough inspections and prior to the installation of any interior finish material.
 - Installation of all finished materials, sealings of exterior joints, plumbing piping, trim and fixtures; electrical wiring, devices and fixtures; mechanical systems equipment.

Additional required inspections for all subcodes of construction, for other than one- and two-family dwellings, are fire suppression systems, heat producing devices and Barrier Free subcode accessibility, if applicable.

- Required special inspections. The applicant by accepting the permit will be deemed to have consented to these requirements:
- A final inspection is required for each applicable subcode area before a final Certificate of Occupancy or Approval may be issued. The final inspections include the installation of all interior and exterior finish materials, sealing of exterior joints, mechanical system and other required equipment; electrical wiring, devices and fixtures; plumbing pipes, trim and fixtures; tests required by any provision of the adopted subcodes, Barrier Free accessibility, if applicable; and verification of compliance with NJAC 5:23-3.5, "Posting structures".
- A complete copy of released plans must be kept on the job site.

If you do not understand any of this information, please ask.
